McKinsey & Company
3 World Trade Center
175 Greenwich Street
New York, NY 10007

Dear McKinsey Recruiting Team,

I am writing to apply for the Business Analyst Intern position at McKinsey & Company for Summer 2026. I am an Economics major with a Minor in Data Analysis at Wesleyan University, graduating in May 2027. After speaking with Yaw Boateng, a Partner at McKinsey's Lagos office, I was struck by the firm's commitment to building transformative institutions across emerging markets and developing exceptional problem-solvers. I believe my experience leading complex projects and performing rigorous analytical work positions me well to contribute to McKinsey's client teams. Key strengths include:

- **Structured Problem-Solving and Stakeholder Management:** As Director-General of the African Leadership Academy's Model African Union Conference, I managed a \$100,000+ budget coordinating logistics for 200+ delegates from 20 countries. I developed a structured fundraising strategy and executed three investment pitches, securing nearly \$10,000 that enabled 30 delegates to attend fully funded for the first time—a 300% increase in scholarship recipients.
- **Analytical Rigor and Quantitative Skills:** At Beza, I performed market analysis across African education and workforce sectors using Python and Excel, identifying trends that informed product strategy. I built automated data-cleaning pipelines that reduced report preparation time by 30%. Through Wesleyan's Investment Group and Wall Street Prep's Financial Modeling Course, I developed proficiency in financial statement analysis, DCF modeling, and Excel—skills fundamental to consulting.
- **Drive for Impact and Continuous Learning:** As a Patricelli Center Fellow, I won second place in Oxford's Map the System competition for my case study addressing Nigeria's 20 million out-of-school children. I am currently pursuing the Dartmouth Tuck Bridge Program and training weekly in case interviews through Consulting Pathways, reflecting my commitment to developing the skills necessary to create lasting change at scale.

I am particularly drawn to McKinsey's work at the intersection of education, economic development, and public sector transformation in Africa—areas where my lived experience and analytical capabilities can add unique value. McKinsey's apprenticeship model and emphasis on intellectual rigor align perfectly with how I approach problem-solving.

I am confident my analytical mindset, cultural fluency across African markets, and technical skills would enable me to add value to McKinsey's client teams from day one. Thank you for considering my application. I would welcome the opportunity to discuss how my background aligns with McKinsey's mission and am available for an interview at your convenience.

Sincerely,

Naomi Ivie
